

Prompt for Mode 1 (Baseline Generic Prompt + No RAG):

MAC LAYER LOGS:

{log_segment}

Analyze the wireless link quality from the given MAC layer logs and suggest improvement strategies.

Prompt for Modes 2,3 (Baseline Generic Prompt + RAG (concat, LLM trans)):

MAC LAYER LOGS:

{log_segment}

RELEVANT CONTEXT (3GPP 38.321 + OAI MAC):

{context_str}

Analyze the wireless link quality from all of the given MAC layer logs and suggest improvement strategies.

Prompt for Key Event Extraction + Targeted Prompt (Modes 4,7,10,13):

MAC LAYER LOGS:

{log_segment}

RELEVANT CONTEXT (3GPP 38.321 + OAI MAC):

{context_str}

FIVE ANOMALOUS EVENTS DETECTED:

{top5_str}

Find the root cause event from the five events listed above. Analyze the root cause event error and trace its impact on subsequent connection quality. Build a causal chain.

Prompt for Key Event Extraction + Targeted Prompt + RAG (Modes 5,6,8,9,11,12):

MAC LAYER LOGS:

{log_segment}

FIVE ANOMALOUS EVENTS DETECTED:

{top5_str}

Find the root cause event from the five events listed above. Analyze the root cause event error and trace its impact on subsequent connection quality. Build a causal chain.
